## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicants claim a 4-nitroxbutyl ester of 2-(6-methoxy-2-naphthyl)-propanoic acid compound. The novel feature of this compound is that it is an enantiomeric excess of the (S) form, which is higher than or equal to 97%. The closest prior art of record U.S. Patent number 5,700,947 or WO 98/25918 discloses the racemic mixture of the compound. The prior art compound is only capable of producing an enantiomeric excess of 94% and does not disclose any process to increase the enantiomeric excess above 94%. Thus, one of ordinary skill in the art could not merely modify the disclosure of the prior art by routine experimentation to arrive at the instant compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
